Theories and Applications in Contemporary Ethics

A Cross-Disciplinary Offering
CEED 6100 (3 credits)
www.fordham.edu/EthicsCourse

Open to all Graduate Students and Select Seniors | Master’s in Ethics and Society Core Course

19–21 May 2015 9 a.m. to 5 p.m.
Fordham University
Rose Hill Campus

This three-day course will provide students with a cross-disciplinary background in ethical theory and decision-making that can be applied to their own field of study.

Course Requirements
- Readings
- Response Papers
- Post-Workshop Paper & Presentation (in the student's field of study)

Course Description
This intensive graduate-level course is designed to provide cross-disciplinary perspectives on moral theory and applied ethics. Using a team-teaching approach, this course brings together faculty from six disciplines to provide foundational knowledge about moral theory with contemporary applications. In addition to seminars on foundations in moral philosophy, moral theology, and bioethics, the course features lectures and case discussions on issues of current social importance.

Course Schedule
Day 1 | Philosophy and Political Science
Special Topic: “Border Crossings and Immigrant Detention in the U.S. and Europe: Ethical, Political, and Comparative Considerations”

Day 2 | Bioethics and Natural Science
Special Topic: “The Ethics of Genetic Testing”

Day 3 | Theology and Psychology
Special Topic: “Moral Obligations to LGBT Youth: Theological and Psychological Perspectives”

Course Enrollment
Open to graduate and select seniors. Non-matriculated students interested in enrolling in the course should contact Adam Fried (below).
